

# Improving Workers' Compensation Outcomes Through Prompt Reporting of Claims

By reporting claims **PROMPTLY**, you can reduce the rising costs of Workers' Compensation claims.

## WHY prompt reporting is beneficial:

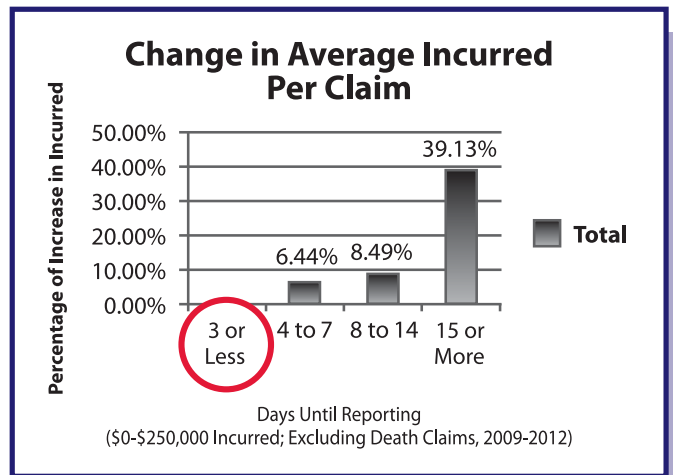

- MSIG Data shows claims reported within 3 days of the injury produce better results and ultimately cost less.
- Appropriate and Timely Medical Care can be provided through our Preferred Provider Networks.
- Employee morale remains intact.

## WHAT are the consequences of late reporting?

- Potential increase in Litigation.
- Jeopardizes the timely and thorough investigation of the claim.
- Claims reported more than 3 days after the injury results in higher costs. (see Graph)

## HOW to achieve the best results.

- Educate employees on the importance of prompt Claim reporting.
- Report injuries to MSIG immediately.
- Establish a goal of reporting 80% of ALL Claims within 3 days.
- Stay involved in the claim process!

The graph above is based on a study of MSIG's claim data from 2009-2012 and clearly indicates the impact that Prompt Reporting has on controlling workers' compensation costs.
